PROJECTS

Travel Website

Aug 2021- Oct 2021

<https://github.com/Snehal2207/MEAN>

- Technologies used: HTML5, CSS, Bootstrap, JavaScript, Pug, MongoDB, AngularJS, NodeJS and Express
- Successfully led a team of 3 members and implemented a complete working MEAN stack web application.
- Collaborated with the stakeholders, performed requirement analysis, and summarized a document with various needs for the project before initiating the actual implementation
- Built and maintained a database in the cloud using MongoDB with required validations
- Directed team members to understand their roles and responsibilities, conducted daily scrum meetings, and managed deadlines for each sprint

Cuisine De Palace , Restaurant

Jan 2021-April 2021

<https://github.com/Snehal2207/ResponsiveSiteDesign>

- Technologies used: HTML5, CSS
- Efficiently managed the fully responsive website design from prototype to testing and deployment phase and completed all the given requirements within the period
- Proposed different design ideas to stakeholders through presentations and received approval
- Coordinated with team members to identify best resources to use for design, testing, and deployment

UX/UI Website Prototype Design

Jan 2021-April 2021

<https://github.com/Snehal2207/Photoshop>

- Technologies: Trello boards, Adobe Photoshop, Adobe Bridge
- Prepared documentation and developed 'Travel Based' static website with animated graphics, and eye-catching colors
- Responsibly managed Trello board to organize tasks daily
